Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1618

Claims 1-4 are presented for examination.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 4 recite the limitation "antiseptic agent, a chelating agent, a buffer, an isotonizing agent, a thickener, a surface active agent, an antibacterial assistant, a non-ionic surface active agent, a cationic surface active agent and an ampholytic surface active agent" in claim 1. There is insufficient antecedent basis for this limitation in the claim.

Claims 1-4 are rejected under 35 U.S.C. 103 as being unpatentable over The Patent abstract of Japan 10319358 and Patent Abstract of Japan 10108899 for the reasons set forth on pages 2 and 3 of the office action of January 15, 2003.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant alleges criticality to the "antibacterial" activity of the claimed polyalkylamine. Applicant in his arguments insists that the prior art does teach the antibacterial activity of the claimed polyamine. The arguments are not well taken. Applicant is reminded that the claims of the instant application are composition claims, which reads on the compound and a pharmaceutically acceptable carrier regardless of the intended use. Additionally, the prior art teaches the use of the claimed polyamine as a preservative, which inherently contains some antibacterial activity. Thus, to use

the same compound as the prior art in a pharmaceutical composition at different concentrations does not create a patentably distinct composition in the absence of evidence to the contrary. There is no evidence of record to demonstrate the advantages of the claimed composition over the prior art composition. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-4 are properly rejected under 35 U.S.C. 103.
